Professional Summary

Data Analyst with **2+ years** of experience in **BI reporting**, **data preparation, financial** and **operational analytics** for global enterprise clients. Skilled in **Power BI**, **SQL**, **Python** and **Excel**, with hands-on expertise in **cleaning**, **transforming** and **validating** large datasets. Strong ability to build **data models**, **KPI dashboards** and **automated reporting pipelines** that improve decision-making and reduce manual effort. Experienced in collaborating with **finance**, **operations** and **engineering** teams to support **data-driven decisions**, **performance tracking** and **data quality improvements**. Actively developing foundational **data engineering** skills (ETL, data pipelines, warehouse concepts, and scalable SQL) to complement analytics and improve cross-system data reliability.

Professional Experience

System Engineer – Data Analytics | *Client: Glaxo Smith Kline*

Infosys – Hyderabad **Mar 2023 – Feb 2024**

- Built and automated **Power BI dashboards and scorecards** used by global operations and finance teams.
- **Performed data wrangling, validation, and transformation** using SQL and Excel for analysis-ready datasets.
- Eliminated **reporting redundancies** by introducing standardized templates and automation frameworks.
- Partnered with stakeholders in **Agile sprints**, contributing to requirements, UAT, and dashboard iterations.

System Engineer – Data Analytics | *Client: Johnson and Johnson*

Infosys – Hyderabad **Jan 2022 – Feb 2023**

- Conducted **data profiling, reconciliation, and validation**, improving data accuracy by **30%**.
- Developed **Power BI and DAX dashboards** to track sales trends, KPIs, and performance movements.
- Created **metadata, documentation, and data dictionaries** to strengthen reporting governance.
- Supported **finance and ops teams** with ad-hoc analysis, variance insights, and data troubleshooting.

Projects

Ride-it Analysis

(Power BI, DAX, Excel, SQL, ETL) — GitHub

- Designed **validated KPI dashboards** following UI/UX standards, improving clarity and stakeholder adoption.
- Performed **EDA, anomaly detection** and **root-cause analysis** to uncover operational inefficiencies and performance gaps.
- Derived financial and engagement KPIs (Revenue, Profit, Conversion, YoY/MoM trends) to support leadership decisions.
- Built **automated data refreshes** and standardized data wrangling logic for consistent reporting workflows.

Bike Sales Analysis

(Tableau, Data Visualization, Business Analytics) — GitHub

- Cleaned, shaped, and prepared datasets directly within Tableau to create consistent and analysis-ready financial views.
- Built interactive dashboards applying **data storytelling** and **visual design standards** to highlight sales and customer insights.
- Developed calculated metrics (AOV, Profit KPIs, YoY/MoM trends) to support performance evaluation and strategic decisions.
- Conducted **time-series** and **demand pattern analysis**, enabling forecasting inputs and improved sales planning.

Technical Skills

Data Analytics and Preparation: EDA, Data Wrangling, Data Cleaning, Anomaly Detection, Trend Analysis, Feature Engineering
Business Intelligence and Reporting: Power BI, Tableau, Advanced Excel, DAX, KPI Dashboards, MI Reporting
Programming and Databases: SQL, Python (Pandas, NumPy), MySQL, MS SQL Server, Oracle SQL
ETL and Pipelines: Azure Data Factory, Azure Data Lake, Data Transformation, Automated Reporting Pipelines
Data Quality and Documentation: Data Validation, Data Profiling, Reconciliation, Metadata Documentation, Standardization

Education

MBA (Finance) — Andhra University, AP **2024 – 2026**

Bachelor of Technology (Civil Engineering) — GMR Institute of Technology, AP **2017 – 2021**

Achievements

- Received client appreciation (2023) for delivering Power BI dashboards used by sales and operations leadership.
- Consistently delivered analytics solutions ahead of deadlines, contributing to improved stakeholder trust and faster reporting cycles.
