Professional Summary

System Engineer with **2+ years of enterprise IT experience at Infosys**, developing **Java-based applications** for Johnson & Johnson and GlaxoSmithKline. Experienced in **SQL, data validation, troubleshooting**, and **Agile** software development. Developed strong analytical skills through hands-on projects in **Power BI, Python, and Excel**, focusing on data analysis, dashboard development, and business reporting. Strong problem-solving and analytical mindset with experience translating business requirements into practical technical solutions. Seeking **Data Analyst** and related roles where I can leverage both software engineering expertise and **data-driven problem-solving**.

Technical Skills

Data Analysis & BI: Power BI, Excel, SQL, DAX, Data Cleaning, Data Wrangling, EDA, Trend Analysis, Data Validation

Data Modeling & Reporting: Data Modeling, Calculated Measures, KPI Reporting, Dashboard Development

Programming & Databases: Python (Pandas, NumPy), MySQL, MS SQL Server, Oracle SQL, Java

Software Development: OOP, REST APIs, Spring Boot, Agile

ETL & Data Concepts: ETL Concepts, Data Transformation, Data Pipelines, Data Warehousing Concepts

Projects

Ride-it Analysis

(Power BI, DAX, Excel, SQL, ETL) — [GitHub](#)

- Performed **end-to-end data analysis**, including **data cleaning, transformation, and validation**.
- Built **interactive Power BI dashboards** to monitor revenue, bookings, customer engagement, and ride trends.
- Conducted **Exploratory Data Analysis (EDA)** to identify demand patterns and operational inefficiencies.
- Developed **DAX measures** for **YoY, MoM, and KPI** performance tracking.
- Designed efficient **data preparation workflows** for consistent reporting.

Restaurant Orders Analysis

(SQL, Power BI, Data Visualization, Business Analytics) — [GitHub](#)

- **Performed data cleaning, preprocessing, and transformation using SQL** to prepare reliable datasets for analysis and reporting.
- Conducted **EDA** to analyse customer behaviour, pricing trends, and cuisine performance across restaurants.
- Built **interactive Power BI dashboards** to visualize KPIs, operational metrics, and actionable business insights.
- Identified customer preferences through **trend analysis**, segmentation, and comparative performance analysis.
- Presented **data-driven insights and recommendations** to support informed business decisions and improve operational performance.

Professional Experience

System Engineer | Client: GlaxoSmithKline (GSK)

Infosys – Hyderabad

Mar 2023 – Feb 2024

- Developed and maintained **Java-based enterprise applications** following **Agile** development practices.
- Wrote **SQL queries** to retrieve, validate, and analyse application data during development and production support.
- Performed **data validation and root cause analysis** to investigate application issues and improve resolution efficiency.
- Collaborated with **Business Analysts**, QA teams and developers to understand requirements and support **User Acceptance Testing (UAT)**.
- Prepared **Excel-based reports** and maintained technical documentation to support testing and release activities.

System Engineer | Client: Johnson & Johnson (J&J)

Infosys – Hyderabad

Jan 2022 – Feb 2023

- Developed and supported **Java application modules** for enterprise business processes.
- Utilized **SQL** for backend data verification, defect analysis, and troubleshooting.
- Performed **data reconciliation** between application and database layers to ensure data consistency.
- Worked closely with **business stakeholders** during requirement analysis and UAT activities.
- Created and maintained **technical documentation** and knowledge articles for production support.

Education

Master of Business Administration — Andhra University, AP (92%)

Bachelor of Technology — GMR Institute of Technology, AP (86%)

Achievements

- Received **Client Appreciation Award** for timely delivery and contribution to enterprise application support.
- Successfully completed multiple end-to-end data analysis projects involving SQL, Python, and Power BI.
